

# Nor-Cal VANS

# transit connect

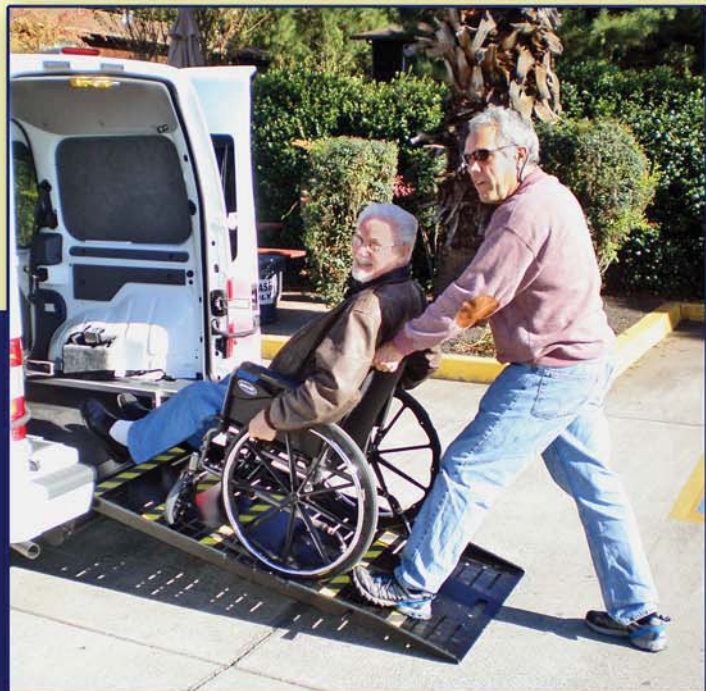

The all-new Ford Transit Connect offers both agility and versatility.

The Transit Connect boasts high fuel economy -- good for both you and the planet. With more miles per gallon, you can be in service longer and with less gas-station breaks. You'll be able to cover more ground in less time with less cost.

The size of the Transit Connect makes it an agile vehicle, able to move in and out of tight spaces with street-smart maneuverability. The Transit Connect offers the feel of a car with the cargo room of a van. This savvy combination makes it the ideal choice for wheelchair transportation, either commercial or private.

Added flexibility is provided by the accessibility package. This manual ramp and lowered floor make loading and unloading a wheelchair or equipment a snap. Besides not consuming battery power, this long-life ramp requires little in the way of maintenance.

The Transit Connect Accessibility Conversion provides plenty of room for four passengers and a wheelchair or large equipment while exceeding ADA requirements.

Overall Van Height	80"
